

MUSCULOSKELETAL / PHYSIATRY REFERRAL FORM

Access Orthopaedics provides patients with timely access to comprehensive assessment and care for musculoskeletal conditions and injuries by our expert multidisciplinary team. We are also able to accept physiatry referrals for Dr Daniela Porter and serve as a central intake for a number of the Orthopaedic Shoulder and Elbow Surgeons in the Calgary zone. All assessments are covered with a valid Alberta Health Care Card. **Please note we do not accept WCB cases.**

ACCESS
ORTHOPAEDICS
PHYSIOTHERAPY
SPINE

Our team of experienced Orthopaedic Surgeons, Neurosurgeon, Psychiatrist, musculoskeletal trained Physicians and Physiotherapists provide a comprehensive assessment and treatment plan customized to each patient's needs. This enables us to identify the most appropriate surgical and non-surgical management options. Our streamlined approach avoids treatment delays and reduces healthcare costs by eliminating multiple referrals, ensuring appropriate use of imaging, and directing patients to the right practitioner who can best assist with their care when required.

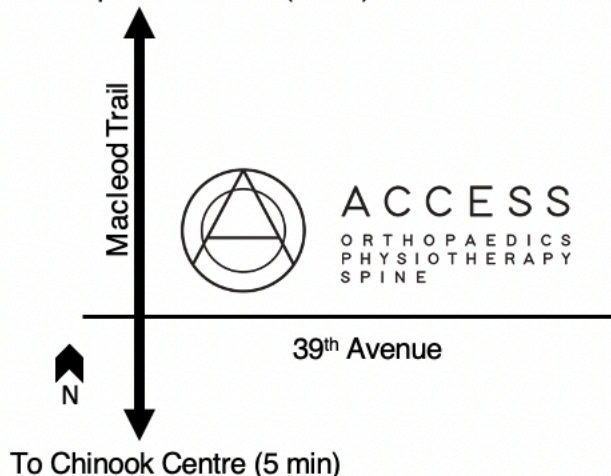

Right Patient to the Right Practitioner at the Right Time

In collaboration with a number of Orthopaedic Shoulder and Elbow Surgeons in the Calgary zone, we are assisting in the management of their surgical wait lists through triage assessments to ensure patients are provided with a treatment plan in a timely fashion and are directed to the appropriate provider. This has resulted in a reduction in wait times for surgical consultation and provides non-surgical patients with an assessment and conservative management options sooner.

Comprehensive Care in a Central Location

Our multidisciplinary team extends beyond the assessment, including onsite radiology services for diagnostic imaging and pain management (injections), allowing us to provide care to patients throughout their rehabilitation journey. Our experienced Physiotherapists provide individualized one on one rehabilitation services focusing on an active based treatment approach.

To Stampede Grounds (3 min)

Centrally located in the Macleod Professional Centre on the corner of Macleod Trail and 39th Avenue, walking distance from the 39th Avenue C-train Station

Free 90 minute parking
(registration required)

**Assessments are covered by
Alberta Health Care with a
valid Alberta health care card.**
